Plant Products commits \$25,000 to assist Guelph Turfgrass Institute Relocation

Plant Products Inc. is excited to partner with the Guelph Turfgrass Institute (GTI) in the relocation to their new permanent home on the University of Guelph owned property on College Ave East. Plant Products considers it essential to create local expertise in the growing and maintaining turf; from home lawns to sports fields and golf courses.

Plant Products commitment goes well beyond this original donation. Chris Stickle President of Plant Products states “We plan on screening and trialing many products at the GTI with the intent to get more registrations, more local developed data and a showcase to show off these demonstration plots to our customers and staff.” He continues “With this move by GTI and our increased commitment to the green space in Canada, we see a great partnership to bring our customers local solutions for many turf problems”

GTI is also excited to partner with companies like Plant Products that show a commitment to the excellent work in the past and our commitment to the future of research in Ontario. Eric Lyons, Associate Professor of Turfgrass Science, University of Guelph commented “As we get ready to open our new facility, we are thankful to all our partners like Plant Products that have stepped up and made a financial commitment to ensure our success for this year and years to come”
