Subject: Certificate of conformity

PRO-MIX products are made of Sphagnum Peat Moss, which is partially decomposed plant matter derived from the accumulation of aquatic moss plants within a bog. All our bogs were former wetlands and have not been used as agricultural land. No pesticides or herbicides are used on the peat bogs.

This letter of conformity guarantees that PRO-MIX products undergo strict quality control testing in order to meet the product specifications and are in compliance with the requirements of Good Manufacturing Practices. All components used are exempt GMO.

All Pro-MIX products meet the Canadian Food Inspection Agency regulatory requirements and Mycorrhizae added in most of the products is registered as a growth supplement, according to the fertilizer's act.

Mycorrhizae: *Glomus intraradices* reg. number 940078A
