STATEMENT FOR MINERAL ORIGIN OF POTASSIUM SULFATE

We hereby declare that:

Allganic® Potassium or Sulfate of Potash Water Soluble 0-0-52

Is produced from natural mineral salts in the North of Chile. The production process utilizes the method of mineral salts treatment, specifically by using schoenite, $K_2SO_4 \times MgSO_4 \times 6H_2O$, and potassium chloride, KCl, both natural salts crystallized from brines extracted from Atacama salt lake by solar evaporation. No addition or fortification with synthetic chemicals of the potassium sulfate occurs is done during the process.

Therefore, the production process of this product does not involve any material forbidden by the Canadian Organic Production System, General Principles and Management Standards (CAN/CGSB-32.310-2015, last amended on June 2018).

Yours faithfully,

For SQM
